

# Ayres Sensory Integration Intervention Fidelity Measure Training

Including an additional half day of clinical  
reasoning and application

## Course Objectives

Upon completion of this workshop, the participant will be able to:

1. Discuss ways in which the Fidelity Measure contributes to research and evidence-based practice
2. List four main structural elements essential in the provision of therapy using ASI
3. Describe the 10 process elements essential to the delivery of ASI
4. Identify interventions that meet the criteria for ASI and those that do not
5. Identify ways in which the structural and process elements of ASI intervention informs occupational therapy practice

Friday, August 12<sup>th</sup> –  
Saturday, August 13<sup>th</sup>, 2011

**Pediatric Therapy Network**

Workshops To Go™

**Pediatric Speech and Occupational Therapy**

**Ayres Sensory Integration Intervention Fidelity Measure Training**  
**Presented by Susanne Smith Roley MS, OTR/L, FAOTA**

**Contact Hours – 12**

**Description:**

Outcomes research on a specific type of intervention must define the intervention including theory, principles and methods and then ensure that the intervention provided during the study is faithful to the descriptions. The Fidelity Measure of Ayres Sensory Integration® (ASI) intervention is a reliable and valid tool that summarizes the essential structural and process elements of therapeutic practice using sensory integration theory and methods. During this workshop, participants will learn the essential elements of ASI as delineated in the Fidelity Measure and learn to use this tool to improve research and practice.

**Who should attend:**

Professionals interested in research and evidence-based practice using sensory integration theory and methods.

**Registration Form**

Print and fax or mail to Integrative Therapy Concepts

(704) 799-6825 (fax)

134 Infield Court, Mooresville, NC 28117

- Early registration  
(By July 20, 2011) \$225.00
- Registration  
(After July 20, 2011) \$275.00
